Listing of the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

1. - 33. (Canceled)

- 34. (Previously presented) A device for controlled local delivery of rifaximin comprising between 0.5 wt% and 30 wt% rifaximin and a bi-phasic material, wherein in said bi-phasic material the solid phase is an elastic polymeric matrix comprising polyvinylalcohol, and the liquid phase is water that fills up the pores of said matrix.
- 35. (Previously presented) A device as claimed in claim 34 wherein the weight ratio between the water and the polymeric matrix is up to 10.
- 36. (Previously presented) A device as claimed in claim 34 said polymeric matrix comprises a polymer selected from the group consisting of polysaccharides, cellulose derivatives, alkyl-cellulose, hydroxyalkyl-cellulose and polyacrylates.

37. (Canceled)

38. (Previously presented) A device as claimed in claim 34 wherein said polymeric matrix further comprises an acrylic polymer.

2

- 39. (Previously presented) A device as claimed in claim 38 containing between 0.5 wt% and 30 wt% of rifaximin, 10 wt% of polyvinylalcohol and between 0.2 wt% and 20 wt% of acrylic polymer.
- (Previously presented) A device as claimed in claim 34 further comprising a bioadhesive polymer.
- 41. (Previously presented) A device as claimed in claim 40 wherein said bio-adhesive polymer is selected from the group consisting of hydroxypropylmethylcellulose, alginates, carboxymethylcellulose, hydroxyethylcellulose and acrylic polymers.
- 42. (Previously presented) A device as claimed in claim 40 wherein said bio-adhesive polymer is homogeneously mixed into the polymeric matrix.
- 43. (Previously presented) A device as claimed in claim 40 wherein said bio-adhesive polymer is applied to the surface of the polymeric matrix.
 - 44. (Previously presented) A device as claimed in claim 34 in the form of a film.
- 45. (Previously presented) A device as claimed in claim 34 containing in combination with rifaximin also other antibiotics and/or antiinflammatory and/or pain relief and/or anesthetic drugs.

- 46. (Withdrawn) Method for the delivery of rifaximin in the oral cavity that comprises utilizing the device of claim 40.
- 47. (Withdrawn) Process for the preparation of a device according to claim 34 comprising the following steps:
 - a) rifaximin and said bi-phasic material are dissolved in water;
 - b) a divalent salt is added to the solution of step a).
- 48. (Withdrawn) Process as claimed in claim 47 wherein said divalent salt is calcium chloride.
- 49. (Withdrawn) Process as claimed in claim 47 wherein said divalent salt is added at a concentration of up to 2 wt%.
- 50. (Withdrawn) Process as claimed in claim 47 wherein the solution of the step a) contains 10 wt% of polyvinylalcohol, between 0.2 wt% and 20 wt% of acrylic polymer and between 0.5 wt% and 30 wt% of rifaximin.
